SPRING 2014

ANDREW MASKERY ASSOCIATES

Animal Health & Agricultural Supplies

Nick and Ray

At Andrew Maskery Associates we deliver personally to any East Anglian door for free. And what's more, our excellent relationships with leading manufacturers enables us to offer easy access to agricultural supplies at the right prices regardless of the size of your farming business.

We stock 1000+ products from 40+ top brand suppliers and now with our even bigger, better on board fridge supplying our farmers with an expert, trustworthy local service for vaccines has never been easier - just ask our proud drivers, Nick and Ray!

More friendly faces

Our helpful advice and your next order for our competitively priced farming supplies are always just a phone call away. This spring sees Andrew and Debbie Maskery welcoming two new arrivals to the office: experienced colleague, Hilary Stearn, who we'll be introducing you to properly in our summer newsletter and Oscar, Zoe's adorable new black Labrador puppy!

Fly Control – What buzz words for springtime! We're pleased to be associated with Lodi, developers of the most comprehensive range of fly control products for the British livestock farmer.

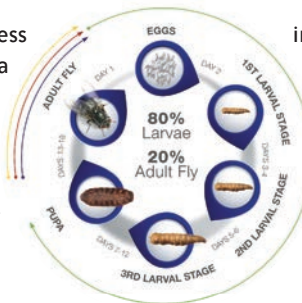

Flies can harbour and transmit in excess of 100 diseases, including salmonella and our farms are the perfect breeding ground for flies to thrive. Watch out! Flies you see flying around only make up 20% of the fly life cycle, so 80% are still at the egg or larvae stages...

At Andy Maskery Associates, we offer a range of high quality pest control products, courtesy of Lodi's 30 years of experience.

Maggots: This highly effective larvicide stops maggots from developing into adult flies. Apply by spraying or scattering the granules into the manure where flies lay their eggs. Available in 10 kg / 20 kg bags.

Sheila: A ready-to-use, granular insecticide with powerful attractants and a very effective bait which kills adult flies instantly. Apply by first painting cardboard with wallpaper paste, then sprinkling on the granules before fixing inside the buildings. Available in 500g / 2kg pots.

Twenty One: This uniquely formulated product against flies, is applied by painting or spraying onto a wall or ceiling in all livestock housing and lasts for up to twelve weeks. Quick tip: paint

in strips leaving a landing area for flies to then feed. Available in 1kg box.

Perbio Choc: The strongest ready-to-use insecticide in the UK. It kills within seconds and is also a residual product, so if sprayed onto a surface, it will continue to keep killing even when it appears to have dried up! Effective against the Common and Lesser Common house fly and red mite. Available in 5 litre packs.

Knock Down: A very cheap, ready-to-use fly spray to control nuisance flies. A fast and effective water-based product. Available in 5 litre packs.

Fly Glue Rolls: A popular product with our customers – non-toxic and environmentally-friendly especially for control of flies in the farm environment.

Digrain Wasp/Hornet Destroyer: Available in 600ml cans. Or check out **Digrain Flying /Crawling Insect Destroyer** which also kills wasps.

Quartz Wasp/Hornet Killing Powder: Available in 3kg buckets.

Please give us a call to see how we can help with fly control at a cost-effective price.

More Bug Busters

Say goodbye to blowfly, ticks, biting lice, headfly, fluke, worms and external parasites.

Focus on... Rappa Electric Fencing Because best value really matters

Electric fencing specialists, Rappa, have always believed in providing products to farmers which really make a difference. Now in recognition of our shared values and commitment to exceptional customer service, one of the most successful electric fencing companies in the world has teamed up with Andrew Maskery Associates in a first class relationship which delivers very competitive prices with an impressive helping of special deals and offers along the way.

Family-run business, Rappa, started out nearly 30 years ago when South Downs sheep farmer, Harry Ridley, invented the unique Rappa electric fence machine to help him manage his large flocks more easily. As well as developing the system into a complete range, the company offers all the supplementary products required to install and maintain electric fence.

“The business has been born out of supporting positive farming practises,” explains Rappa’s Sales Manager, Mark Grant-Goodey. “Many of our products are manufactured by us from the highest quality materials so that they last and there’s a real value difference in that.”

At Andrew Maskery Associates, our customers confirm to us again and again that Rappa make the best quality – and best value – electric fencing wire on the market and that their choice of energiser units marketed under the *Speedrite* name provides reliable, fuss-free electric fencing for a wide range of livestock. *No matter how great or small, why not give us a call to discuss your electric fencing needs?*

At the sharp end

At Andrew Maskery Associates, we get to the point of what matters to you as a farmer and seek to provide really effective solutions. That's why we are proud to be one of the only suppliers in the UK to offer detectable needles, and pleased to support our customers through the *Pharm-Binz* easy waste transfer service for clinical sharps and pharmaceutical waste.

Set fees cover the bin, delivery, collection and incineration of the waste to provide you with a waste transfer note to comply with your farm assurance. *Why not give us a call to find out more?*

Now we've certainly got it licked!

Our customers have acquired such a taste for our Zintec nutritional licks (or at least their sheep and lambs have!) that we're now stocking a great range from Rumenco which are also suitable for cattle.

The *SUPAlyx* tubs and *Rumevite* blocks provide complete mineral and vitamin supplements in standard, high energy or high magnesium formulas.
