## SUMMER 2013

## ANDREW MASKERY ASSOCIATES

### Animal Health & Agricultural Supplies

Debbie and  
Andrew Maskery

We set up Andrew Maskery Associates in 1999 to support local farmers with an expert and trustworthy local service, offering you easy access to agricultural supplies at the right prices regardless of the size of your farming business.

From farming stock ourselves, we understand the issues, the priorities and the legislation. Both Andrew and recently another team member have relevant SQP licences (*Congratulations Zoe!*), enabling us also to stock and sell licensed animal health products.

Our customers comment on our expertise and ease of ordering and really value that we personally deliver to any East Anglian door for free. Above all, we think that like them, you'll really appreciate the very competitive prices which we can pass on to you as a result of our excellent relationships with leading manufacturers.

Unit 21, Saxtead Business Centre,  
Saxtead, Woodbridge,  
Suffolk IP13 9RD

**At Andrew Maskery Associates we understand that agricultural businesses come in all shapes and sizes. So whether you're a smallholder or large scale farmer, our one-stop service has been developed to meet all your farming and livestock needs.**

From electric fencing to forks and water troughs to wellies, our warehouse is stocked with a wide selection of tried and tested products from top brand suppliers, available to you on trade account at the most competitive prices.

#### If the glove fits...

With crop spraying coming up, there's never been a better time to get your hands on (or in) our new Globus range of work and safety gloves. Practical and hardwearing as you would expect, but designed with comfort in mind too, the chemical resistant, light weight gauntlets are already proving to be a firm favourite in the arable world and great value too.

#### Year round support...

We are looking forward to introducing our customers with ewes and lambs to the exciting Zintec's range which includes the new 3-in-1 flock protection products. This cost-effective lick is a very simple method of enhancing your flock's natural resistance to parasitic attack and also nutritionally improving common skin and foot problems. UK tested and proven, it includes chelated trace elements and the revolutionary Imuherb plant extract. The mineral licks come in a number of varieties, including high energy and high magnesium and a 20kg plastic bucket is estimated to support 30 ewes for 12 days.

#### Efficient and cost-effective ...

An amazing 25% of Britain's estimated 420,000 sows are supported by Andrew Maskery Associates and many of our pig farmer customers both great and small have been confirming our positive impressions of new developments with Uniferon, the world's favourite pig iron product. Now available in a 12 x 200ml box as well as the current 10 x 100ml with a free injector, the product is even more cost-effective. It is popular for outdoor pigs, and has a proven track record in improving weight gain and preventing piglet anaemia.

#### Easy to get hold of...

At Andrew Maskery Associates, our friendly advice and your next order is only a phone call away. We're people persons, so we've not succumbed to the impersonality of the internet, preferring to be able to listen to your needs and give you the support you really require, or pop in to see you for a face-to-face if you like, rather than ask you to go e-shopping. Our trade counter at our warehouse near Framlingham is available for a bit of retail therapy if you prefer to view products before you buy.

### BIG ENOUGH TO COMPETE

Livestock • Equestrian  
• Pet Supplies  
(& we cater for people too!)

1000+ stocked products from

at Saxtead  
Business Centre,  
just off the A1120  
near Framlingham

Open Mon – Fri  
9.00am – 5.00pm

## Focus on... Fly Treatments

**Blowfly, redmite, bugs and larvae – summer brings an ongoing struggle against strikes by unwanted pests whatever the farming environment. Planning to disinfect farrowing pens, poultry huts, stables, kennels, sheep units and cattle sheds is of paramount importance.**

At Andrew Maskery Associates we stock the widest range of tried and tested preventative pest control and fly treatments. We are on hand to give independent, professional advice on the most cost-effective products to suit your specific needs. We thought we would take this opportunity to share just a small selection of the many solutions which you will find on our shelves.

It's an uncomfortable thought that we can only tend to see the 20% of flies and pests that are

airborn - the other 80% might be less discernible, but are certainly out there. With up to 7,000 maggots in 1 kg of muck, fly problems can occur very quickly and pose a real threat to the welfare of our livestock, pets and even ourselves.

'Maggots' is an easy to use, water soluble granular fly larvicide which targets 80% of a fly's life cycle. It is specially formulated to stop larvae developing and to break the fly cycle so that flies are eliminated. It offers a long residual effect and is safe to use around livestock, with results seen on the adult fly population within two weeks of the initial application.

### PROTECT YOUR WHOLE FLOCK WITH CLIK

- Blowfly strike prevention, providing full 16 weeks cover
  - Crovect is the ideal add-on for treatment against ticks, biting lice, headfly or fly maggots
- Both from Novartis ectoparasiticides.

### FRONTLINE ADVANTAGE

- Spot on for dogs, cats and small pets
- Topical application against fleas and biting lice

From Bayer

### NATURAL EFFECTIVE PEST CONTROL FROM ORGAN-X

- Powder & spray, the natural way to kill all crawling insects including red mites and bed bugs

From Lodi UK

### TOTAL MITE KILL FROM TOTAL POULTRY SOLUTIONS

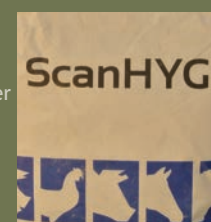

- Ready to use & just right for the job

From Nettex

### SCAN HYG

- Highly absorbent, dry disinfectant powder
- Easy & economical for all livestock bedding units

From ScaGro

### GALLOP/KILLITCH/FLYGARD

- Shampoo & treatments against Sweetitch and fly problems for horses

From Carr & Day & Martin

### Get wired!

Ensuring that livestock are safe and secure in outside environments often requires a bit of technical support. At Andrew Maskery Associates, we offer everything for your electrical fencing needs from reels, tape, wire and hardware to solar, mains and battery operated energizer units. Ideal for flexible livestock control, the Speedrite Unigizer is just one product we've got our eye on as a versatile 3-in-1 solution for mains, battery or solar power use. It is ideal for small to medium sized field and paddock areas.

## Choose Pharm-Binz for the safe disposal of farm clinical waste, sharps & blades

- Our unique service in waste transfer supports you in farm insurance compliance
  - Hassle-free collection & incineration service
  - 10 litre clinical sharps bin – £12.00
